

Big Rock Games® LLC

Mequon, Wisconsin – October 16th, 2012

Big Rock Games® LLC is proud to announce that Tiamat ©, a 2D action-puzzle game that challenges your memory, strategic skills, and hand-eye coordination, is available on iPhone, iPad, and now also on Mac OS X.

The Game.

Tiamat © is a marble matching, puzzle game where matching symbols is just the beginning! Race against the clock as you reveal and match all the symbols in a string before you get overwhelmed. Grab power-ups quickly to retake the advantage! Make consecutive matches to get the highest possible score. Tiamat offers unique strategic twists not found in other marble matching games! Tiamat simultaneously challenges your memory, hand-eye coordination and strategic skills.

Tiamat© has a custom set of matching symbols that are displayed as a string of balls enters the playing area. The player must try to memorize the location of these symbols as best as possible, while forming a strategic plan to make matches. Once a string has entered, the symbols are hidden inside the rolling marbles. The player clicks on any two marbles within a single string, revealing the symbol inside. If both color and symbol match, the marbles are cleared from the string. Make combos by making several matches in a row. Power-ups may spawn at any time and can give any of three possible effects: revealing a match in the current string, allotting extra time, or slowing down all strings for a few moments.

Venture across fifty levels comprised of ten unique paths with beautiful graphics, getting the highest score possible. Match symbols to form combos for huge scores. Match bonuses to gain the edge you need to conquer each level. Join in the excitement and experience the fun of Tiamat HD©.

Can you conquer Tiamat HD©? Find out on today!
